Skills

I am a web developer experienced in programming node js web applications. I have programmed for roughly 3 years, starting with java in school. I like learning new libraries, and making apps with current technology. I have developed an app that uses MongoDB to Railway, with mongoose as a client to manage connections. I also know Postgres DB design, and have designed a database for an LMS. I can implement various authentication methods, including session storage, and JWT.

Experience

Mar, 2024 - PRESENT

Groupy App – *Developer*

- Sole developer of Groupy app (closed source)
- MongoDB, Node/Express.js, templating
- Chat app meant to connect college students via their college emails
- Found at:

Oct, 2023 - Dec, 2023

Bath and Body Works– *Retail Associate*

- Cashier/stocker

Education

Aug, 2021 - May, 2026

Virginia Tech, Blacksburg, VA – *B.S. CMDA*

Awards
