[\(443\) - 624 - 0454](tel:(443)-624-0454)

Personal Site: <https://elliohip.github.io/personal-site/>

Skills

- Languages: Node js, C, Java, Python, Client-Side Javascript, HTML + CSS
- Libraries: Express js, Socket IO, React, Vue, Phaser JS
- Tools: Linux OS, Godot, Prisma (SQL)

Projects

Jan, 2026 - Current

2D Action Adventure Platformer– *Designer, Developer, Project Lead*

- Engineered custom kinematic character controllers and state-machine logic using GDScript, optimizing physics calculations for fluid gameplay.
- Implemented the Animation Logic, Audio logic, and Behavior Tree Logic for various elements of the game

Apr, 2025 - May, 2025

Phaser js Demo

- Developed a small single room demo with phaser js. Used as a technical proof-of-concept for browser-based 2D physics before migrating behavior and controller systems to Godot.
- Implemented top-down 2d Physics for a desktop oriented web browser

Education

Aug, 2021 - Current

Virginia Tech, Blacksburg, VA – *B.S. Computational Modeling and Data Analytics*

Awards

VTHacks 2022 hackathon – 1st place:

- Led the UI development of Handstrumment, a Body-Movement Tracker to simulate playing various instruments using an attached camera
